# Pedigreed Seed *Spring* 2012

| Seed        | Variety                              | Suggested retail | Specification  |
|-------------|--------------------------------------|------------------|--|
| Green Peas  | CDC Striker                          | \$13.00/bu       | Smooth round peas, excellent color, bleach resistance. Great yields. These peas are requested by name in global markets.   |
|             | CDC Patrick                          | \$13.00/bu       | Good resistance to bleaching and powdery mildew, slightly smaller seed size.   |
|             | CDC Tetris and CDC Pluto             | Call for price   | Limited quantities. Please call for availability.  |
| Yellow Peas | AAFC                                 | \$16.00/bu       | AAFC is a new yellow pea from SECAN out of Alberta Agriculture and Rural Development in Lacombe has excellent yield and standability. Registered seed available. |
|             | CDC Meadow                           | \$13.00/bu       | Yield, standability and low seed coat breakage, an early maturing pea has a proven performance record.   |
|             | CDC Prosper (small)                  | \$12.00/bu       | Smaller seed size, this niche market pea used for birdseed and sprouting markets, yields great as well.  |
| Maple Peas  | CDC Acer and CDC Rocket              | \$14.00/bu       | CDC Acer has smaller seed size than Rocket, markets have their individual preferences.   |
| Red Lentils | CDC Maxim and CDC IMAX               | \$0.32/lb        |  |
| Lentils     | Green lentils - varieties by request | Call for price   | Individually sourced from farmers good germ and low disease -common seed only.   |
|             | French and Beluga by request         | Call for price   | Individually sourced from farmers good germ and low disease -common seed only.   |
| Mustard     | common seed untreated                | \$0.90/lb        | Call for availability.   |
| Wheat       | Waskada CWRS Wheat                   | \$12.00/bu       | Lowest fusarium susceptibility ratings and yields higher than Superb.  |
|             | Unity CWRS Wheat                     | \$13.00/bu       | A proven performer for yield response. Midge tolerant.   |
|             | Stettler CWRS                        | \$14.00/bu       | NEW! high protein and yield, a solid performer for the future.   |
|             | Sadash CWSW Wheat                    | \$11.00/bu       | This is an up line to AC Andrew with slightly better yield & performance, great standability.  |
| Barley      | CDC Copeland                         | \$10.50/bu       | Proven performance for malt and yield, plus market acceptance.   |
|             | CDC Meredith                         | \$10.75/bu       | Higher yield, lower protein. This variety is under development, must be grown under a malt contract.   |
|             | CDC Austenson                        | \$10.00/bu       | 2 Row Feed Barley with excellent numbers for yield and silage, New! Limited quantities available.  |
| Flax        | CDC Sorrel                           | \$22.00/bu       | Large seed size, this high yielding flax is great for the bakery and the oilseed markets.  |
